CST8921
Cloud Industry Trends

Course Outline

2025-2026

Pre-requisite(s)	N/A
Co-requisite(s)	N/A
Prepared by	John Dallas
Approved by	John Dallas, Chair
Approval date	Wednesday, July 23, 2025
Normative hours	42.00
Grading system	A+ Through F

Applicable Program(s)	Level	Core/Elective
1531X01FWO - Cloud Development and Operations	2	Core
1531X03FWO - Cloud Development and Operations	2	Core
1531X07PAO - Cloud Development and Operations	2	Core
1531X09FAO - Cloud Development and Operations	2	Core

Land Acknowledgement

Algonquin College campuses in Ottawa, Perth and Pembroke are located on the traditional unceded, and unsurrendered territory of the Anishinàbe Algonquin People. The Algonquin People have inhabited and cared for these lands since time immemorial. We take this time to express our gratitude and respect to them and to the land for all that it has provided and will continue to provide.

As a post-secondary institution, we acknowledge the harms done to Indigenous Peoples and are committed to learning from the past. We pledge to promote healing and resilience as we move forward in partnership with the Algonquin Nations, First Nations, Métis, and Inuit Peoples in a spirit of reconciliation.

While we recognize that territorial acknowledgements are only one step in cultivating greater respect and inclusion of Indigenous Peoples, we commit to accompanying these words with actions. We are dedicated to building a future and community that is better for all.

We pledge to continue exploring and making meaningful contributions to the Truth and Reconciliation Commission of Canada's Calls to Action.

Course Description

With the rapid rate of innovation in cloud computing, keeping pace with the latest technological developments, best practices, and managed solutions is a never-ending task. Students explore current relevant industry trends, such as software development and testing techniques, SDKs and APIs, laws concerning data storage and privacy, new hardware virtualization technologies, data analytics solutions, Internet of Things (IoT), artificial intelligence, or cybersecurity. Students investigate and present innovative technologies and techniques relevant to the cloud computing industry.

Vocational Learning Outcomes

This course provides the opportunity for you to achieve the following outcomes:

1531X01FWO - Cloud Development and Operations

VLO 2 Select and deploy appropriate cloud environments to support a variety of workloads in a rapidly changing business environment. (A)

VLO 3 Design and implement highly-available and elastically-scalable solutions within cloud computing platforms to maximize the reliability and resiliency of application services. (A)

VLO 5 Evaluate and integrate industry best practice recommendations into the design and development of secure cloud-based solutions to protect the privacy and integrity of client data. (A)

VLO 7 Assess and implement policy monitoring and compliance strategies and tools to ensure all deployed cloud-based solutions adhere to relevant regulatory, governance and legal requirements. (A)

VLO 8 Apply collaborative project management principles to identify, track and effectively communicate project goals, costs, constraints and deliverables, that support successful project outcomes. (A)

1531X03FWO - Cloud Development and Operations

VLO 2 Select and deploy appropriate cloud environments to support a variety of workloads in a rapidly changing business environment. (A)

VLO 3 Design and implement highly-available and elastically-scalable solutions within cloud computing platforms to maximize the reliability and resiliency of application services. (A)

VLO 5 Evaluate and integrate industry best practice recommendations into the design and development of secure cloud-based solutions to protect the privacy and integrity of client data. (A)

VLO 7 Assess and implement policy monitoring and compliance strategies and tools to ensure all deployed cloud-based solutions adhere to relevant regulatory, governance and legal requirements. (A)

VLO 8 Apply collaborative project management principles to identify, track and effectively communicate project goals, costs, constraints and deliverables, that support successful project outcomes. (A)

1531X07PAO - Cloud Development and Operations

VLO 2 Select and deploy appropriate cloud environments to support a variety of workloads in a rapidly changing business environment. (A)

VLO 3 Design and implement highly-available and elastically-scalable solutions within cloud computing platforms to maximize the reliability and resiliency of application services. (A)

VLO 5 Evaluate and integrate industry best practice recommendations into the design and development of secure cloud-based solutions to protect the privacy and integrity of client data. (A)

VLO 7 Assess and implement policy monitoring and compliance strategies and tools to ensure all deployed cloud-based solutions adhere to relevant regulatory, governance and legal requirements. (A)

VLO 8 Apply collaborative project management principles to identify, track and effectively communicate project goals, costs, constraints and deliverables, that support successful project outcomes. (A)

Assessment Levels —T: Taught **A**: Assessed **CP**: Culminating Performance

Course Learning Outcomes / Elements of Performance

When you have earned credit for this course, you will have demonstrated the ability to:

1. Examine new technologies, techniques, and service offerings relevant to the cloud computing industry.

1.1 Identify the key components and benefits of serverless computing to meet specific business requirements

- **1.2** Evaluate Cloud AI and ML services to gain deeper insights from data and improving business productivity
- **1.3** Discover new cloud security trends and best practices to store, manage and share data to protect sensitive information from cyber threats
- **1.4** Access the benefits, challenges, and cost of using multi cloud and hybrid IT strategies
- **1.5** Evaluate the scenarios for enterprise trends ranging from cloud optimizations to adoption of containerized workloads

2. Test the implementation of example use-cases for relevant cloud topics.

- **2.1** Verify and compare the use of cloud storage and replacing hard drives to store large amount of data
- **2.2** Implement common use cases of serverless computing techniques, including real-time data processing, event-driven applications, and microservices.
- **2.3** Examine and research AI as a service and accessed through web API to automate mundane tasks and increase the accuracy of the business processes
- **2.4** Evaluate cloud security use cases and techniques to strengthen data security and integrity

3. Compare new solution options to current common practices.

- **3.1** Describe cloud provider offerings to improve cloud security and resilience in cloud applications
- **3.2** Analyze the advantages of using multi cloud approach in comparison to hybrid cloud strategy
- **3.3** Identify the future use cases to integrate AI and ML services to create more efficient and cost-effective cloud services for customers.
- **3.4** Evaluate the tools and platforms to create applications using low-code or no-code approach

4. Debate the merits of various cloud computing trends.

- **4.1** Analyze the benefits by optimizing the performance, security, and cost-efficiency of serverless applications.
- **4.2** Evaluate the current practices and cost-effective approach to innovate and scale AI and ML services
- **4.3** Discuss the benefits of container-based cloud service to deploy distributed systems/microservice architectures.
- **4.4** Examine and optimize business processes using big data analytics to extract business value and derive meaningful information.

Learning Resources

Recommended Resources:

- All recommended texts and resources will be provided in Brightspace.

Hardware and Software:

- Links will be provided in Brightspace

To access your course list, learning resources and costs, visit Booklist.
Please note that a learner must be registered in a specific course or program to view this information.
Program tuition and fees can be found on the Tuition and Fees Estimator for Full-time Programs page.

Learning Activities

During this course, you are likely to experience the following activities:

- Labs
- Hybrid learning activities
- Class discussions
- Presentations
- Assignments

Pre-defined Evaluation / Earning Credit

The following list provides evidence of this course's learning achievements and the outcomes they validate:

Lab Activities and/or Practical Assessments (35%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4

Research Assignment(s) (30%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4

Presentation(s) (20%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4

Final Project (15%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4

Prior Learning Assessment and Recognition

Students who wish to apply for Prior Learning Assessment and Recognition (PLAR) need to demonstrate competency at a post-secondary level in all outlined course learning outcomes. Evidence of learning achievement for PLAR candidates includes:

- Portfolio
- Project/Assignment

Course Related Information

Please refer to the Course Section Information (CSI) / weekly schedule for specific course-related information as provided by your professor.

Program Information

1531X01FWO - Cloud Development and Operations

Cloud Usage
Students in this program may be exposed to Cloud Software through student accounts but they should never use their Credit Card for these services. Algonquin College will not be responsible for a students' utilization of Online Services or Cloud Based Applications.

Appropriate Use of Generative Artificial Intelligence (GenAI) Tools and AI-Assisted Resources
In alignment with Algonquin College Policy AA48 (Academic Integrity), students must follow the specific evaluation instructions for each assessment and consult the professor if they are unsure whether GenAI tools are permitted. For the purposes of this course, "GenAI/AI-assisted resources" includes any tool, device, software, browser feature, plug-in, or service that can generate, rewrite, summarize, translate, solve, or provide suggested answers or content (e.g., chatbots, writing/code assistants, AI search tools, and AI-enabled devices such as smart glasses or similar wearable technology). Unless an assessment explicitly allows such tools/resources, students should assume they are **not permitted**. Where use is allowed, students must clearly acknowledge and/or cite that use as directed by the instructor. Submitting AI-generated or AI-rewritten content as one's own work, using AI outside the permitted scope, or failing to acknowledge/cite permitted use may be treated as academic misconduct under AA48.

Department Information

STUDENT ACADEMIC RESPONSIBILITIES

Each student is responsible for:

- Knowing the due dates for marked out-of-class assignments.
- Attending all classes and knowing the dates of in-class marked assignments and exercises.
- Arriving to class on time and remaining for the duration of the scheduled class.
- Maintaining a folder of all work done in the course during the semester for validation claims in cases of disagreement with faculty.
- Keeping both paper and electronic copies of all assignments, marked and unmarked, in case papers are lost or go missing.
- Regularly checking both Brightspace announcements as well as one's Algonquin e-mail account for important messages from both professors and college administration.
- Participating in on-line and classroom exercises and activities as required.
- Retaining course outlines for possible future use to support applications for transfer of credit to other educational institutions.

Harassment/Discrimination/Violence will not be tolerated. Any form of harassment (sexual, racial, gender or disability-related), discrimination (direct or indirect), or violence, whether involving a professor and a student or amongst students, will not be tolerated on the college premises. Action taken will start with a formal warning and proceed to the full disciplinary actions as outlined in Algonquin College Policies - HR22 and SA07.
Harassment means one or a series of vexatious comment(s) (whether done verbally or through electronic means), or conduct related to one or more of the prohibited grounds that is known or ought reasonably to be known to be unwelcome/unwanted, offensive, intimidating, derogatory or hostile. This may include, but is not limited to: gestures, remarks, jokes, taunting, innuendo, display of offensive materials, offensive graffiti, threats, verbal or physical assault, stalking, slurs, shunning or exclusion related to the prohibited grounds.

For further information, a copy of the official policy statement can be obtained from the Student Association.

Violation of the Copyright Act
General – The Copyright Act makes it an offence to reproduce or distribute, in whatever format, any part of a publication without the prior written permission of the publisher. For complete details, see the Government of Canada website at http://laws.justice.gc.ca/en/C-42 . Make sure you give it due consideration, before deciding not to purchase a textbook or material required for your course.

Software Piracy - The Copyright Act has been updated to include software products. Be sure to carefully read the licensing agreement of any product you purchase or download, and understand the terms and conditions covering its use, installation and distribution (where applicable). Any infringement of licensing agreement makes you liable under the law.

Disruptive Behaviour is any conduct, or threatened conduct, that is disruptive to the learning process or that interferes with the well being of other members of the College community. It will not be tolerated. Members of the College community, both students and staff, have the right to learn and work in a secure and productive environment. The College will make every effort to protect that right. Incidents of disruptive behaviour must be reported in writing to the departmental Chair as quickly as possible. The Chair will hold a hearing to review available information and determine any sanctions that will be imposed. Disciplinary hearings can result in penalties ranging from a written warning to expulsion.

For further details, consult the Algonquin College Policies AA32, SA07 and IT01 in your Instaguide.

College Related Information

Algonquin College's policies have been developed to ensure the health, safety and security of all students, faculty and staff, and the proper and fair operation of the College as an academic institution and employer. Please refer to the Algonquin College Policies website for the most current policy information available at http://www.algonquincollege.com/policies/.

Students are especially encouraged to be aware of the following College expectations

Academic Integrity
Algonquin College is committed to the highest standards of academic integrity, and students are expected to uphold these standards throughout their learning journey with the College and post-graduation. Any academic work submitted by a student is expected to be their own work, unless designated otherwise, all human and technological assisted generated sources must be attributed. Refer to the College's Library web site for attribution support and resources. All students are expected to be familiar with the College's AA48: Academic Integrity policy which outlines student and staff roles and responsibilities, the process for addressing, determining and ruling final academic decisions regarding violations of academic integrity as well as what represents academic misconduct. Students with any questions about academic integrity course expectations including but not limited to use of technology, generative AI and other resources to support completion of coursework, are encouraged to speak to their professor and refer to the course weekly schedule, assessment instructions, course announcements and materials.

Centre for Accessible Learning (CAL)

Students with visible and/or non-visible disabilities are encouraged to register with the Centre for Accessible Learning (CAL) in order to be eligible for appropriate learning supports and/or accommodations. Students are strongly encouraged to make an appointment with the Centre for Accessible Learning as early as possible when starting a program. Once your needs are identified, a Letter of Accommodation (LOA) will be issued which you can share with your professors through the CAL Student Portal. If you are a returning student, please ensure that professors are given a copy of your LOA each semester.

Test Accommodations for Students Registered with CAL
Students who require testing accommodations will book their tests/exams through the CAL Student Portal. It is important to note the posted test/exam booking deadlines for the term. Test booking deadlines are communicated through CAL Disabilities Counsellors, CAL Testing Services, and other college wide communication. Additional information on the steps to book accommodated tests/exams with CAL Test Services can be found at Step-by-Step Overview.

Retroactive Accommodations
Students are expected to meet evaluation and completion deadlines as stated in course outline and weekly schedule documents. In circumstances where evaluation deadlines are missed or student performance has been affected by a temporary, significant and/or unanticipated change in functional ability related to disability (including mental health), interim or retroactive accommodations may be considered. For these instances it is advised you reach out to CAL or your professors as soon as possible. For other situations where deferral of evaluations may be warranted, please consult Algonquin College Policy AA21: Deferred Evaluation.

Network Credentials and College Email
Students at Algonquin College are provided with a college email account. This is the address that will be used when the College, your professors, or your fellow students communicate important information about your program or course activities. Your network credentials can be found in the ACSIS portal and you are expected to check your Algonquin email regularly and to use it to send and receive college-related email. Students are required to maintain the privacy of their AC login credentials. Sharing network credentials poses a security risk and is subject to disciplinary action. Your responsibility to protect your login credentials is governed by the Information Security Policy IT01. Support is available through the college Information Technology Service (ITS) at: https://www.algonquincollege.com/its/

Mental Health and Wellness Supports
Canada has launched a national Suicide Helpline at www.988.ca and a wide range of mental health and wellness resources for Algonquin students are available at www.algonquincollege.com/SSS/student-health-wellness.

Student Course Feedback
Algonquin College invites students to share their course experience by completing a student course feedback survey for each course they take. For further details consult Algonquin College Policy AA25: Student Course Feedback.

Use of Mobile Devices in Class
With the proliferation of small, personal mobile devices used for communications and data storage, Algonquin College believes there is a need to address their use during classes and examinations. During classes, the use of such devices unless authorized by your professor can be disruptive and disrespectful to others. During examinations, the use of such devices is generally prohibited unless authorized by your professor. Otherwise use is considered academic dishonesty in the form of cheating. For further details consult Algonquin College Policy AA32: Use of Electronic Devices in Class

Technology Requirements
Students are required to have access to a computer and to the internet. There may also be additional technology-related resources required to participate in a course that are not included in the course materials fee, such as headphones, webcams, specialized software, etc. Details on these requirements can be found in the Weekly Schedule document of the course for each course available on Brightspace.

Transfer of Credit
It is the student's responsibility to retain course outlines for possible future use to support applications for transfer of credit to other educational institutions.

Safe Harbour
In the event of an unexpected major event (pandemic, etc.), your course may have changes that are not reflected in the Course Outline. Should this happen, the Weekly Schedule document will have updated information about your course.

Other Information

Students are required to respect the confidentiality of employer, client and/or patient information, interactions, and practices that occur either on Algonquin College premises, or at an affiliated clinical/field/co-op placement site. Concerns regarding clients, patients, and/or employer practices are to be brought to the attention of the program coordinator, or designated field/clinical/co-op placement supervisor so that they

may be resolved collaboratively. Such concerns are not to be raised publically either verbally, in writing, or in electronic forums. These matters are to be addressed through established program communication pathways.
